50X1-HUM

1. The largest chemical works in Slovakia is the Dynamitka factory, formerly Nobel, at Bratislava. It employs from 3,000 to 4,000 workers.
2. Dynamitka's chief production is of industrial explosives, including varieties for use under water. Most of the output is sent to the USSR and to the Ostrava mining area in northern Moravia.
3. Other products include sulfuric and formic acid, which go entirely to the USSR, as well as nitric and hydrocyanic acid. A small amount of explosive material for torpedo war heads and aerial bombs is also produced. 50X1-HUM
4. The chemical works at Novaky (T97) employ 600 workers as well as a number of ex-prisoners of war. The factory was built [redacted] principally to exploit the labor of a nearby [redacted] concentration camp. It is now part of 50X1-HUM the Bata trust, and its output is concentrated on materials for tanning leather.
5. The Bata works are engaged in the production of great quantities of boots and shoes for the USSR.
6. At Smolenice (T13), near Trnava, a factory employing about 1,000 workers produces dyestuffs. This factory has expanded since the end of the war.
7. There is a small dyestuffs factory at Modra (T01) which employs 450 workers. It also produces cosmetics which are sent exclusively to the USSR.
8. The alkaloid factory near Hlohovec (T43) employs 800 workers to produce morphine and other drugs, as well as pharmaceutical products. The drugs are used as a source of hard currency as they have been put on the black market [redacted] 50X1-HUM
9. A small factory near Piestany (T44), employing about 125 workers, is under the control of the Slovak secret police. It is known to have bacteriological laboratories, but its products are unknown. All production goes to the USSR.
